

ORDER FORM

Bike Racks

The Downtown BIZ wants to install bike racks downtown to make frequenting buildings and amenities easier for visitors, workers and residents.

- Bike racks encourage no-emission transportation!
- The Downtown BIZ will subsidize 50 per cent of the cost of a bike rack (this also applies to multiple orders)
- The Downtown BIZ will handle the installation
- The Downtown BIZ is open to other urban bike rack options. Please call us to discuss these options that would best suit your needs.
- *Please note: The BIZ is limited in the number of bike racks they can subsidize. This is a first come first serve opportunity.*

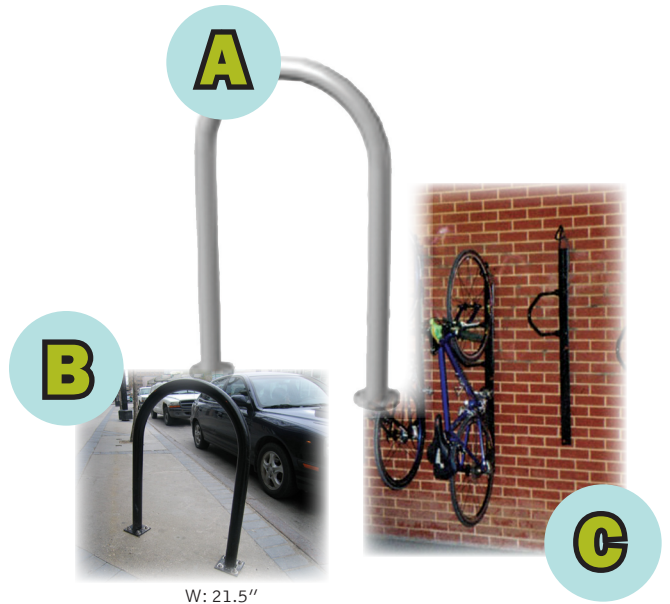

Key Features to Consider:

Wall Mount - Easily adjustable heavy-duty wall-mounted bike rack suited for tight spaces where compact storage is needed. Supports one bike each in the vertical position.

Inverted U - Enables the bike frame and one or both wheels to be secured at the same time. Supports two bikes in an upright position.

Galvanized - Hot dipped galvanized finish provides superior extended maintenance-free protection against rust.

Black Powder Coating - Black powder coating is a quality paint finish that coordinates with ornamental streetscaping and/or building features.
